

Assignment # 03

Course Instructor: Mr. Muhammad Aamir Gulzar

Course: Professional Practices in Information Technology

Instructions:

- This is a group assignment. Maximum three members can be in one group.
- In this assignment, you need to research the standard contracts from internet and also go through the relevant lecture slides.
- If there are any assignment-related queries, first read the document carefully. If your query is still unresolved, you can e-mail your TA.
- Submit your file under the naming **convention iXXXXXX_Section.pdf (E.g. i210328_A.pdf)**.
- Submit the assignment on time. Late submissions will receive a 10% penalty per day (acceptable for the next two late days only).
- Assignment will be due by **30 November,2025 11:59 pm**.
- You may be asked to present your assignment before the class, so work honestly.

Assignment Theme:

This assignment assesses your understanding of Computer Contracts, Types of Contracts, and Employment Contracts. Your group must analyze the case studies provided and create appropriate contract documents according to the scenario.

Case Study 1: Software Development Contract (Computer Contracts)

A mid-sized retail company wants a custom inventory management system. Your group acts as a software development firm responsible for drafting a complete Software Development Contract. The contract must include scope of work, deliverables, payment terms, intellectual property clauses, confidentiality, maintenance, termination clauses, and dispute resolution. The retail company worries about project delays and security risks.

Case Study 2: Service Contract or Licensing Contract (Types of Contracts)

A startup needs cloud-based accounting software. They are unsure whether to purchase a service contract (SaaS) or a licensing contract for installation on local servers. Your group must prepare suitable contract drafts with its justification, highlighting some important things such as liability, ownership, data rights, updates, risk sharing, and support.

**National University of Computer and Emerging Sciences
Islamabad, Pakistan**

Case Study 3: Employment Contract for IT Staff (Employment Contract)

A technology firm is hiring a full time Network Security Engineer. Your group must draft a complete Employment Contract outlining responsibilities, job description, probation period, salary structure, confidentiality, non-compete clause, termination process, and employee rights. The firm is concerned about employee turnover and data leaks.

Each group must do;

- Analyse all three case studies, for any help refer to relevant lecture slides.
- Draft three separate contracts (one for each case study).
- Ensure the contracts follow professional standards and legal structure.
- Include a 300–400-word justification explaining why the chosen contract structure fits the case.

Rubrics for Marking

Tasks	Marks
Contract Structure & Completeness	30
Legal Accuracy & Professional Standards	30
