

**National University of Computer and Emerging Sciences
Islamabad, Pakistan**

Assignment # 1

Course: Professional Practices in Information Technology

Sections: A, B, C, D, K

Instructions:

- In this assignment, your own perspective is required, so you are not allowed to submit the response from GPT.
- If there are any assignment-related queries, first read the document carefully. If your query is still unresolved, you can e-mail your TA.
- Submit your file under the naming **convention iXXXXXX_Section.pdf (E.g. i210328_A.pdf)**.
- Submit the assignment on time. Late submissions will receive a 10% penalty per day (acceptable for the next two late days only).
- Assignment will be due by **16 September 2025, Tuesday 11:59 p.m.**
- Deadline will not be extended. Trust me, you will need the breathing room for the next assessments. This one is easy and short anyways.
- You may be asked to present your assignment before the class, so work honestly.

Human Rights, Religion, and Computing in the Digital Era

The Universal Declaration of Human Rights (UDHR, 1948) laid the foundation for modern human rights, emphasizing universality, equality, and dignity.

Later, the Cairo Declaration on Human Rights in Islam (CDHRI, 1990) was drafted by the Organization of Islamic Cooperation (OIC) to provide an Islamic perspective on human rights, aligning with Sharia principles.

Both declarations aim to safeguard human dignity but differ in some important areas, such as freedom of religion, freedom of expression, gender equality, and the role of law.

In today's world, technology and computing introduce new ethical challenges (e.g., data privacy, AI bias, cybercrime, digital divide). This raises the question: *Should human rights be updated to include rights specific to the digital era?*

National University of Computer and Emerging Sciences Islamabad, Pakistan

Tasks

Answer the questions below precisely maximum 1000–1200 words.

1. Comparison of UDHR and CDHRI (40)

- Select 4 key rights (e.g., freedom of religion, gender equality, freedom of expression, right to privacy, right to life).
- Compare how the UDHR and CDHRI address these rights.
- Highlight where they agree, where they differ, and what unique perspective the CDHRI proposes.

2. Critical Reflection (10)

- Discuss how these differences affect real-world issues.
- Provide one concrete example.
- Reflect: Do these differences create conflict, or can they complement each other?

3. Propose New Computing Rights (30)

- Suggest 3 new rights that should be included in human rights frameworks to address modern computing challenges.
- Justify why these rights are important.
- Provide at least one real-world example in support of proposed computing rights.

Rubrics for marking:

CDHR vs CDHRI (At least four articles)	10 + 10 + 10 + 10
Critical Reflection (Real-world Case Study)	10
New Computing Rights (three) + Case Study	(10 + 10 + 10) + 10
Total	90

-----***Good Luck***-----
